

WistockIT[®]
Optimizing Processes

WistockIT[®]

AUTOMATIZED. DYNAMIC. REORDERING.

**The Next Level of Digitalization
of Ordering Processes**

The Next Level of Digitalization of Ordering Processes

Concentrate on your core processes and profit with *WlstockIT*[®] from an automatized, dynamic tool management system as well as continuous and needs-based availability based on RFID technology.

Overviews on a daily basis, e.g. stock levels, order history or consumption analyses, allow absolute transparency.

The WIKUS Solution for your Challenges in Purchasing and Logistics

Digitalization of Purchasing Processes

WlstockIT[®] is a central building block of your digital procurement strategy. You benefit from the WIKUS system solution which can be used autonomously and flexibly.

Cost Reduction and Process Optimization

WlstockIT[®] provides an automated ordering process, eliminating manual efforts in administration and logistics for repeat orders.

Maximum Delivery Reliability and Tool Availability

WlstockIT[®] safeguards your production processes by ensuring that you have the right tool at any time – and with the lowest possible capital commitment in your warehouse.

Easy Integration into Existing Storage Facilities

WlstockIT[®] consists of a few components that can be easily integrated into your existing infrastructure and storage facilities.

Digital Stock and Consumption Analyzes

The *WlstockIT*[®]-portal provides you with a daily updated overview of stock levels, consumption analyzes and order history. You do not need any additional software for this.

Your added value: Massive Reduction of Costs and Resources

Automated Process

1. Incoming Goods at the Customer

Each WIKUS package is equipped with an RFID tag that contains all item information of the delivery. The new WistockIT® stock level is calculated automatically and transferred to WIKUS.

2. Band Removal

There is also an RFID tag with the item-specific date on each separate band saw blade. Every band removal is transferred to WIKUS and the stock level in the system is reduced automatically.

3. Automated Reordering

If the agreed threshold quantity of an item is undercut, a reorder is triggered automatically at WIKUS.

4. Delivery to the Customer

After the order is received, the goods are directly produced and delivered according to the customer requirements. The shipment is given the necessary RFID tags again for recording in the incoming goods process and to ensure the automatized reordering process.
