

PRESS RELEASE

PRODUCT FAMILY EXPANDED

WIKUS – Sägenfabrik GmbH & Co. KG expands carbide product family!

The carbide product family of the high-tech band saw blade manufacturer from Spangenberg in Northern Hesse is established on the global market for many years. Innovation and progress characterize the family-owned company.

The name of the newly developed carbide-tipped band saw blade is DUROSET® PREMIUM. WIKUS has successfully applied the set carbide band saw blade DUROSET® for the cutting of steels on the market for many years. DUROSET® was once designed for the use on bandsaws without carbide package.

In order to optimize the processing of steels on bandsaws without carbide package, the departments „Research & Development“ and „Technical Support“ of WIKUS – Sägenfabrik developed DUROSET® PREMIUM.

DUROSET® PREMIUM is a coated band saw blade with a hardness of approx. 3800 HV. A higher blade-life results from this innovative advancement. At least the same cutting performances and thus a significantly optimized economic efficiency of the cutting process are the results of the use of DUROSET® PREMIUM. Another advantage is the reduced noise emission.

Successful internal and external cutting trials verified the performances of this new blade quality.

About WIKUS

For more than 50 years the name WIKUS has been standing for maximum precision, quality and performance. With these characteristics the manufacturer for high-tech bandsaw blades from Spangenberg in Hesse, Germany achieved a very good reputation. Today WIKUS is represented in more than 70 countries and is one of the worldwide market leaders for metal cutting tasks. Moreover WIKUS is the biggest manufacturer for bandsaw blades in Europe. Operators from steel production, steel distribution, machine construction, automotive industry, aerospace, building sector and the solar industry profit from the all-round solutions of WIKUS bandsaw blades, whose production "made in Germany" is certified according to all current industrial quality norms.
